INTRODUCES

Reman Engines

Increased Productivity at an attractive price..!!

Genuine Parts takes a step towards Environment Conservation by adopting the Reman Technology in coalition with Technical Resources.

25 Years Of Excellence

Reman Engines are TR's Speciality, an integration of 25+ years of expertise in Management skills, technical skills and process engineering. TRE provides quality reman engines at competitive prices coupled with outstanding customer service & technical expertise.

TR State of the art Workshop is well equipped with In House Machine Shop, Fuel Injection Engineering , Air Conditioned Engine Assembly Room & In House Engine Testing on Computerized Dyanometer. Strict Quality Control processes ensure that all remanufacturing sytems & guidelines are followed to restore reman Engines to its original Performance.

Dynotested With GP Certificate

The GP Reman Engines are remanufactured using GP Parts & Filters & are backed with 6 months warranty.

The Process:

- 1. Inspection :** Each purchased Core is inspected by a qualified technician. Core is properly inspected for missing or damaged parts.
- 2. Disassembling:** Core is stripped bare. All core and gallery plugs are removed. Cylinder Block, Cylinder Head, Crank Shaft, Camshaft and subassemblies are sent to their respective shops.
- 3. Cleaning:** Parts are thoroughly & chemically cleaned to remove dirt, oil, contaminants and foreign material.
- 4. Machining :** Block, cylinder heads, crankshafts are machined to its exact specifications. All the Specifications are maintained to its OEM standard.
- 5. Final Assembly:** A qualified technician does final engine assembly.
- 6. Testing :** All Taurus remanufactured Engines are 100% Computerized Dynamometer Tested.
